

Company Overview

Oasis Imaging Centre was established in 2015. Since then, our company has been dedicated to providing the highest quality diagnostic imaging services. Our primary focus is to deliver accurate and reliable results while ensuring the comfort and well-being of our patients.

Company Mission

To provide the best imaging services at an affordable cost to patients in a timely manner, while providing exceptional customer service as we prioritise their health.

Company Vision

To foster a compassionate and friendly environment for all patients and to provide excellent quality imaging that is easily accessible to all patients.

Welcome to Oasis Imaging Centre

Oasis Imaging Centre is a one stop radiological facility with experienced and trained professionals who will take care of your health. Our office is fully equipped with the latest technology to help diagnose medical conditions. Our aim is to cater to the overall radiological needs of our patients while providing exceptional customer service.

Our Services

MRI

Magnetic Resonance Imaging (MRI) is a non-invasive imaging technology that produces three dimensional detailed anatomical images. It is often used for disease detection, diagnosis & treatment monitoring.

CT SCAN

These are special X-ray tests that produce cross-sectional images of the body using X-rays and a computer. This procedure allows doctors to detect things that a normal X-ray would not.

ULTRASOUND

A procedure that uses high-energy sound waves to look at tissues and organs inside the body. The sound waves make echoes that form pictures of the tissues and organs on a computer screen.

X-RAY

Procedure by which electromagnetic radiation passes through the body onto film to provide images of internal structures. This is used to assess if there are any fractures or changes in major bone structures.

MAMMOGRAM

Mammography uses a low dose x-ray to aid with early detection of breast cancer in women.

ECG ELECTROCARDIOGRAM

A diagnostic tool that is routinely used to assess the electrical and muscular functions of the heart.

Why Choose Us?

- ✓ Less Waiting Time
- ✓ Quick Report Turnaround Time
- ✓ Certified & Skilled Doctors
- ✓ Open Long Hours
- ✓ Ample Parking

Quick Turn Around Time

48 hours for X-Ray, Ultrasound, Mammogram, CT Scan, ECG | 24 Hours for MRI Reports
